TISSUE BARRIERS

a new peer-reviewed journal

Andrei I. Ivanov, Ph.D., Editor-in-Chief

Virginia Commonwealth University

Richmond, VA USA

CALL FOR PAPERS

We are pleased to announce our new quarterly journal, *Tissue Barriers*!

Tissue Barriers is the first international, cross-disciplinary journal that focuses on the architecture, biological roles and regulation of tissue barriers and intercellular junctions. We publish high quality peer-reviewed articles that cover a wide range of topics including structure and functions of the intestinal, airway, renal, epidermal and other types of tissue barriers, biology of blood-brain and blood-testis barriers, molecular composition and dynamics of epithelial and endothelial junctions, leukocyte, tumor cell and pathogen interactions with epithelial and endothelial layers, non-cellular components of tissue barriers, barrier dysfunctions in diseases and drug delivery across epithelial and endothelial barriers.

Tissue Barriers publishes several categories of articles including: Original Research Papers, Short Communications, Technical Papers, Reviews, Views and Commentaries, Hypothesis and Meeting Reports. Reviews and Views and Commentaries will typically be invited. We also anticipate special issues that are devoted to rapidly developing or controversial areas of research. Suggestions for topics are welcome.

Tissue Barriers utilizes an online submission and tracking system designed to provide better, more efficient service to authors:

<http://tissbarrier.msubmit.net>

The Editors undertake to provide a peer-review response to the author on each manuscript **within 30 days** following submission.

Please review our submission guidelines:

<http://www.landesbioscience.com/journals/tissuebarriers/guidelines/>

Important for Authors: Page and color charges are waived for the first four issues of *Tissue Barriers*, and the final version of accepted manuscripts will be posted on the website promptly. Any content posted on the website from now until January 2014 will always be free for registered users.

Presubmission inquiries are encouraged and may be sent to the Editor-in-Chief, Andrei Ivanov, aivanov2@vcu.edu.
